

ePrescription for Patient Safety,
efficiency and continuity of care.

Nursing good practices management platform.

Spanish General Council of Nursing

**“Protecting people’s health and ensuring patient safety from an ethical,
autonomous and competent professional practice”**

Prof. José Luis Cobos Serrano. PhD candidate, MSC, RN
Advisor Spanish General Council of Nursing

Nursing good practices management platform

e-care

Objectives

- To educate and train
- To facilitate clinical decision-making
- To facilitate the work in a multidisciplinary team
- To transform information into knowledge
- To facilitate patient autonomy
- To support chronic patients
- To ensure patient safety

Characteristics

- Safety and confidentiality
- Traceability
- Interoperability
- Standardisation / Normalisation
- It avoids 80% of *iatrogenia* cases.
- It supports processes in primary and specialised healthcare

Nursing good practices management platform

e-care

Knowledge management

- Nursing language:
 - Diagnosis (216)
 - Outcomes (490)
 - Interventions (554)
 - Activities (12,000).
- Patient assessment systems
- 200 normalised care plans (80% of the casuistry in specialized healthcare)
- Devising customized care plans
- Repository with 1,100 nursing procedures/protocols

Management of prescribing

- Databases with 40,000 drugs and healthcare products:
 - Technical index cards
 - Patient information leaflets
 - Incompatibilities
 - Interactions.
- Patient clinical history:
 - (25 variables to avoid iatrogenia cases)
- Prescribing on the basis of:
 - Trade name
 - ATC classification
 - Composition
 - Pharmacological activity
 - Laboratory
 - Nursing language
- Pharmacovigilance

WP5 Webinar on Medication Reconciliation

Conclusion

The e-care platform is a useful tool for an ethical, autonomous and competent nursing practice allowing medication reconciliation in a safe manner for professionals and patients themselves.
