3M
3M captures the spark of new ideas and transforms them into thousands of ingenious products. Our culture of creative collaboration inspires a never-ending stream of powerful technologies. 3M is the innovation company that never stops inventing. Our innovations have improved daily life for hundreds of millions of people all over the world. We have made driving at night easier, made buildings safer, and made consumer electronics lighter, less energy-intensive and less harmful to the environment. With $31 billion in sales, 3M employs 89,000 people worldwide and has operations in more than 70 countries.

Agfa HealthCare
Agfa HealthCare is a global leader in the fast growing market of integrated IT and imaging systems, offering healthcare facilities / hospitals a seamless flow of information and a 360° view of patient care. The company has a unique, holistic approach, enabling it to provide in-depth clinical know-how and fully integrated hospital-wide solutions. These specialized solutions integrate IT and imaging systems for Radiology, Cardiology, Mammography and Orthopedics. Agfa Healthcare’s enterprise-wide IT platform integrates all administrative and clinical data within a healthcare facility and is designed to match the unique needs of specific healthcare professionals.

AAL - Ambient Assisted Living Joint Programme
The AAL (so far Ambient Assisted Living Joint Programme) is a funding activity that aims to create better condition of life for the older adults and to strengthen the industrial opportunities in Europe through the use of information and communication technology (ICT). It carries out its mandate through the funding of across-national projects (at least three countries represented) that involves small and medium enterprises (SME), research bodies and user’s organizations (representing the older adults). The programme is financed by the European Commission and the 22 countries that constitute the Partner States of this Joint Programme.

The specific aims are to:
• Foster the emergence of innovative ICT-based products, services and systems for ageing well;
• Create a critical mass of research, development and innovation at EU level;
• Improve conditions for industrial exploitation;
The programme is strongly focused on the user involvement and on the orientation to market of its projects.
End users are involved at all stages and the time to market is of 3 years after the end of the project.

Alere Inc.
Alere Inc. enables individuals to take greater control of their health at home, under the supervision of their healthcare providers, by combining near-patient diagnostics, health monitoring capabilities, and information technology solutions. Alere’s products and services help healthcare practitioners make earlier, more effective treatment decisions and improve outcomes for individuals living with chronic disease.

Apollo SA
Apollo SA is an ISO 9001 QS advanced eHealth
software house with over 15 years’ experience in knowledge intensive eHealth systems and services.
Apollo SA portfolio ranges from simple Doctor Information Systems to complex, nation-wide integration engines which connect Hospital Information Systems at the regional and national level.

Apollo SA Information systems in healthcare feature implementations based on a state of art medical record (EMR) that monitors administrative and financial parameters of medical practice so that doctors can focus solely on operational decisions. Furthermore, PHR extensions of such systems have been implemented and interoperability applications among HIT heterogeneous systems have been tackled. In the Healthcare field Apollo is implementing both versatile and functional information systems placing a higher value to healthcare services.

**BIOAXIS Healthcare**

BIOAXIS Healthcare is a pioneering firm operating in the field of patient management for over a decade. The company offers an integrated, extensive suite of patient support solutions & services to its clients, being primarily healthcare stakeholders, for the benefit of their patients across all primary chronic & other diseases. Its’ patient support programs (PSPs) benefit client efforts by enhancing patient adherence & therapy success rate outcomes, improving patients’ quality of life & contributing to healthcare spending reduction. BIOAXIS Healthcare has successfully delivered over 40 PSPs to over 35,000 patients across all major chronic conditions & other diseases on behalf of leading, global pharmaceutical & healthcare organisations.

Innovating in innovations that add value, the company offers a certified drug logistics & delivery service through its Drug Refill Centre, a first-of-its-kind for the Greek & Balkan region. Furthermore, BIOAXIS Healthcare has developed e-health solutions that aim to satisfy the modern-day needs of its clients.

**Boston Scientific**

Boston Scientific (NYSE: BSX) transforms lives through innovative medical solutions that improve the health of patients around the world. As a global medical technology leader for more than 30 years, we advance science for life by providing a broad range of high performance solutions that...
address unmet patient needs and reduce the cost of healthcare.

Boston Scientific is dedicated to transforming lives through innovative medical solutions that improve the health of patients around the world. Boston Scientific’s history began in the late 1960s, when co-founder John Abele acquired an equity interest in Medi-tech, Inc., a research and development company focused on developing alternatives to traditional surgery. Medi-tech Inc. today, with more than 24,000 employees and a global network of manufacturing, distribution and technology centers, Boston Scientific remains true to its original mission. Boston Scientific is committed to finding new ways to make every day better for patients, their families and loved ones. We help clinicians improve patients’ lives by delivering innovative medical technologies that lead the world in quality, reliability and efficacy.

As of June 2005 Boston Scientific is direct in the Greek market after acquiring it’s Greek distributor Iatriki Efzin SA. Boston Scientific Hellas has its offices in Athens, 10, Athinas Street, Kallithea, tel. +30 210 9542300 and a branch office in Thessaloniki, 20 John Kennedy Street, Pylaia, +30 2310 845000.

Carestream
A world leader in medical imaging, Carestream Health is a dynamic global company with more than 100 years of leadership. To the customer’s need to provide better outcomes for a better life we add value by delivering flexible, affordable and practical options to help our customers be successful, such as:

• Digital choices for medical imaging (CR/DR/
Analog Equipment) solutions that solve workflow, budget and space challenges while reducing procedure times.
• Scalable healthcare IT solutions – including RIS+PACS, Vendor Neutral Archiving and Cloud Services – enhance productivity while delivering all important ROI and provide medical professionals with valuable clinical tools that lead to improved patient care.
• Market-leading laser imagers for printing medical images of all types.

CCS - Medical Informatics
With a 30 year history, CCS is leader in Greek medical informatics sector, driving improved care across Public, Military and Private Hospitals. CCS software, as well as e-Health and m-Health solutions, are currently implemented in hundreds of sites, more than 60 hospitals, and are used by thousands of clinicians and healthcare professionals, helping them facilitate care for hundreds of thousands of patients in the fields of:

• Laboratory Information System (LIS)
• Radiology Information System (RIS)
• Histology – Cytology System (HC-LIS)
• Microbiology System
• Blood Bank – Transfusion Management
• Medical Record (EMR/EHR)
• Interoperability (HL7/Web services)

Cisco
Cisco is the worldwide leader in networking that transforms how people connect, communicate and collaborate. Website: www.cisco.com
**Computer Solutions**

Computer Solutions S.A. was founded in Athens in 1987, as a result of the cooperation of experts in the fields of Information Technology and the Health Care Sector. Currently, with a clientele that consists of more than 30 public Hospitals and more than 100 private ventures and a complete IHIS platform (ASCLEPIOS™ HOSPITAL) that covers all functional areas of a modern Health Care institution or practitioner, CS is the leading Health IT solution provider in Greece, able to develop and support large scale IT projects and Web/Cloud solutions with an agile mindset and methodology, cutting-edge technologies, full standard compliance, as well as state-of-the-art interoperability through a robust HL7/SOA platform.

**evorad**

evorad is a Greek leading company in the area of Radiology Information Systems (RIS), Picture Archive & Communication Systems (PACS) and Medical Image post processing tools. Founded in 2006 is a member of iKnowHow Group of Companies and its name is an acronym for ‘Evolution in Radiology’. Focused in maintaining high quality products and services, is certified with ISO 9001, ISO 13485 and CE Mark Class IIa. evorad’s products are used by more than 300 users in Greece, Cyprus, Turkey and the US including over 700K patients and more than 1.5M examinations.

**EMC**

We REDEFINE Healthcare
Powerful Solutions to Drive Improved Patient

**Care and a Better Bottom Line**

EMC is a global leader in enabling businesses and service providers to transform their operations and deliver information technology as a service (ITaaS). Collaborating with its ecosystem of global partners provide healthcare professionals with the tools to connect people, processes and information at the point of need. Our information management, workflow, collaboration, and analytics solutions are designed to enhance patient care delivery, ensure regulatory compliance, increase efficiency and cut costs. EMC has been globally successful in enabling healthcare organizations to maximize the efficiency of their information infrastructure according with their specific needs.

**FORTH**

The Institute of Computer Science of Foundation for Research and Technology-Hellas (FORTH) is one of the largest research centers in Greece with well-organized facilities, highly qualified personnel and a reputation as a top-level research foundation worldwide with a mission to perform high quality basic and applied research, develop applications and products, provide services, and play a leading role in Greece and internationally, in the fields of ICT including computational medicine and integrated care solutions in the wider context of predictive, individualized, preventive and participatory medicine.

Contact Information: Tel.: +30 2810 391453, Fax: +30 2810 391496 - email: ehealth@ics.forth.gr

**Gnomon Informatics S.A.**

Gnomon Informatics S.A. is an innovative Information Technology company focusing
on internet powered solutions for Healthcare, Enterprises and Public sector.
Gnomon Informatics S.A. is a leader on eHealth Interoperability Solutions and participates in the epSOS industry team steering group, since its foundation.
During the epSOS project, Gnomon Informatics S.A. successfully participated in the development of the common components of the National Contact Point reference implementation (currently openNCP) thus enabling cross border healthcare in Europe.
Gnomon Informatics S.A. has efficiently supported several participating nations in establishing their pilots and systems, namely Greece, Italy, Malta, and Luxembourg. Gnomon Informatics S.A. has successfully completed four epSOS projectathons (based on IHE connectathon approach) in Bratislava, Pisa, Istanbul and Vienna.
Gnomon Informatics S.A. is a member of HL7 Hellas, of IHE Europe and the Association Greek IT Companies.

Greek Informatics
Greek Informatics (GI) is a company that designs and develops medical informatics software applications. Our activities range from the development of specialized software to integrated solutions and services for public and private hospitals, laboratories and medical centers. GI is active in the field of laboratory automation, databases, network installation and support for management applications. We have developed a series of innovative products, especially in the area of hospital applications.
The company benefits from the long experience of its managers and direct associates. The executives who created GI have a continuous presence in the professional field of medical informatics for more than 20 years.
Our applications were developed with dependability and functionality in mind. We are constantly expanding to meet the growing needs of our customers. All our applications are by design able to connect with other applications either supplied by our company, or with existing Hospital Information Systems (HIS).
The success of our applications is due to the excellent analysis of the real needs of our clients and to very user-friendly interfaces. This is guaranteed by both the scientific proficiency of our medically trained staff and from our experience implementing our applications in real-life situations. The wide acceptance of our products in hospital environments is due to the high degree of specialization and the clear direction of the company when it comes to medical informatics.
Address: Melitona 5, Gerakas 15344, Greece

HL7 Hellas
HL7 Hellas is a non-profit organization established to actively promote HL7 standards both within the Greek territory and in countries of South-Eastern Europe. Its aim is to spread reliable standards for healthcare data exchange, management and integration of data related to patient clinical care as well as the management, evaluation and further development of the HL7 standard protocols.
HL7 Hellas is an affiliate of HL7 International.
HL7 Hellas encourages the creation of flexible standards, guidelines, methodologies, protocols
and other related services and products which will be based on those of the HL7 International Organization, having as main goal to enable the interoperability of information systems in Health & Social Security. It helps both in the preparation of studies and research for the exchange of patients medical records hospitalized in institutions that adopt these standards, as well as in communication. Finally, HL7 Hellas aims to continuously research for further development related to the improvement of the standards.

Website: www.hl7.org.gr
Contact: Dr. Anastassios Tagaris, Director of Standards at tassos.tagaris@hl7.org.gr

HL7 International
Founded in 1987, HL7 International is a not-for-profit standards developing organization (SDO), founding member of the JIC for Global SDO Health Informatics Standardization. HL7 provides globally used interoperability standards that improve care delivery, optimize workflow, reduce ambiguity, and enhance knowledge transfer among healthcare providers, government agencies, vendors, SDOs, and patients. HL7 with 35+ national affiliates (17 European), numbers ~4,000+ members, 55 countries (>90% health IT vendors). The HL7 Foundation established in Brussels (2010) aims to promote and encourage development, use, and accreditation of HL7 frameworks and protocol specifications that serve the needs of Europe enabling high quality, cost-effective health IT.

Website: www.hl7.org

IHE-Europe
Integrating the Healthcare Enterprise Europe
(IHE-Europe) – “changing the way healthcare connects”
The seamless flow of health information between the different healthcare systems across Europe brings tremendous benefits to patients, as well as the doctors and nurses providing vital care. IHE-Europe is dedicated to interoperability in health information technology. It begins with an open process of developing integration profiles to assure IT systems can talk to each other. Then it requires testing these systems to verify that complex computer coding delivers the data. Finally, IHE-Europe actively promotes wider awareness and use of these methods for assuring continued conformance and compatibility. IHE integration and content profiles have been adopted by national and regional projects in countries such as Austria, France, Italy, Switzerland, Slovenia, Luxembourg, The Netherlands and considered by several others. These specifications provide the guidance necessary to implement specific standards and profiles in commercial and self-developed systems that will help realize efforts towards large scale interoperability of health information in Europe.

IMO Europe
Intelligent Medical Objects
IMO® is the market leader in terminology services for electronic healthcare record systems. IMO’s Clinical Interface Terminology products comprise the largest, most sophisticated database of clinician-friendly terms and concepts, all mapped to standard reimbursement and reference nomenclatures including SNOMED CT® and ICD-10-WHO. IMO’s advances in interface terminologies and hardware
allow previously siloed repositories of clinical information to find global reach, enabling patients and practitioners to make better use of information. IMO’s concept-based terminology and appliance provide a platform for innovation that makes it easy for institutions and organizations to innovate, build on, and extend the semantic highway, providing a new form of semantic-based commerce.

Janssen
Janssen belongs to Johnson & Johnson group of companies, one of the most comprehensive health care companies in the world. In Greece Janssen began as a scientific office in 1973 and now one of the largest pharmaceutical companies in Greece. Janssen is oriented in providing innovative and high quality products aiming at improving human lives. With main concern the pharmaceutical research, it discovers, develops and markets innovative drugs in five major therapeutic areas with unmet medical needs:
1. Cardiovascular and metabolic diseases (diabetes)
2. Neuroscience (schizophrenia, dementia, pain)
3. Infectious diseases (HIV / AIDS, Hepatitis C, tuberculosis)
4. Oncology (multiple myeloma, prostate cancer)
5. Immunology (psoriasis, psoriatic arthritis)
Janssen putting into practice the principles of Corporate Social Responsibility is applying for years actions and activities aiming to teach, offer and highlight the importance of health in creating a secure and prosperous future for all.

Johnson & Johnson
Serving life… Johnson & Johnson, via research and technology, brings into the world on a daily basis groundbreaking treatment- and care-related ideas and products for thousands of patients and consumers around the world. Johnson & Johnson is the company with the widest range of products and services in the healthcare sector in the world.

Oracle
Oracle engineers hardware and software to work together in the cloud and in the data center. With more than 120,000 employees, 400,000 customers, and 25,000 partners, Oracle is present in 145 countries. Oracle offers the #1 database, data warehouse, database on Linux, UNIX & SAP, embedded database, application server, middleware, Human Capital, Talent & Recruiting, Enterprise Performance and Business Analytics Management applications, and is the #1 solutions provider for the Public, Financial Services, Banking, Communications, Retail, Healthcare, Construction, Manufacturing, Professional Services sectors etc. globally.

OTE - Hellenic Telecommunications Organization
Hellenic Telecommunications Organization (OTE S.A.) is the largest telecommunications provider in the Greek market, and together with its subsidiaries, forms one of the leading telecom groups in Southeastern Europe. OTE is among the five largest listed companies, with respect to capitalization, in the Athens Stock Exchange. The Group offers a full range of products and services, from fixed & mobile telephony and broadband & TV services, to high-speed data communications and leased lines services. In addition, OTE Group in Greece is also involved in a range of activities,
notably maritime communications, real-estate and professional training.
OTE’s vision is to offer high quality integrated services, in order to remain customers’ first choice throughout Greece and SE Europe, while acting as a responsible corporate citizen delivering value to all its stakeholders.
With the client as a point of reference, OTE affirms its commitment: “Together we are one”.
Website: www.ote.gr

PCC HELLAS
Providing patient compliance services is the main field of activity and development for PCC HELLAS. This is why we invest in human resources and keeping up with the latest trends in medicine, pharmacology and patient care.
PCC HELLAS was founded in 2006 with the ultimate goal to provide reliable services to healthcare professionals assuring PATIENT COMPLIANCE to their treatment. Through our services we assure patients get any kind of support and assistance in order to follow their doctor’s guidelines during the course of treatment. Our team of registered nurses has the expertise and training to make this happen. Thus we can provide safe, continuous and high quality compliance services guaranteeing the best result possible to the patients.
So far thousands of patients and hundreds of doctors in every part of Greece have received our services.

Municipality of Palaio Faliro
Since 2011, the Municipality of Palaio Faliro together with neighboring municipalities of Alimos and Agios Dimitrios pioneer a number of innovative initiatives (“Kane Like Stin Ygeia”, http://www.likestinygeia.eu/) and “SmartCare”, http://pilotsmartcare.eu/) that attempt to overcome barriers between the health and social care silos.
EHealth technologies are essential in establishing sustainable business models for integrated care. ICT supported care systems represent the way towards the new seamlessly integrated care landscape that our citizens want. In particular mhealth services offer a first class opportunity for EU countries to pioneer a future care practice that offers higher quality and increased equality services within limited-resource environments. The support of the E.C. and the valuable lessons we are learning from our partners has furthered opened the discussion to promote integrated care within our communities.

SFEE - Hellenic Association of Pharmaceutical Companies
The Hellenic Association of Pharmaceutical Companies (SFEE) is a non-profit association representing one of the most innovative, productive and extrovert sectors of the Greek economy. It embodies more than 95% of the pharmaceutical market operating in Greece. The 68 Greek and multinational member – companies, are constantly investing in the development of effective medicines and treatments, in order to ensure people’s right to health and better quality of life.
SFEE was founded in 1982 and for 30 years SFEE works to promote positions in support of the common interest of society, the State, and the pharmaceutical companies. Compliance to the Code of ethics - which following recent update incorporated stricter rules -, consists a fundamental principle of all member companies of SFEE.
SFEE is a member of the European Federation of Pharmaceutical Industries and Associations (EFPIA) since 1983. Through the systematic shaping and upgrading of solid and substantiated positions, SFEE contributes
to the enhancement of public health and patients’ access to innovative & generic medicines. Over the years, SfEE has emerged as an equal and reliable partner for the State with its initiatives, proposals and participation in the public dialogue.
